The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim 8 is rejected under 35 USC 101 as claiming the same invention of claims 5-12 of prior U.S. Patent No. 6322634. This is a double patenting rejection.

The rejection is maintained as stated in the paper mailed 7/21/04.

It is acknowledged that instant claim 8 depends on claim 7. Applicant's argument that there are limitations in claim 7 not present in claims 5-12 of the patent are not persuasive because it is conclusory.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-6 and 18-24 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. There is no description in the specification as originally filed of a precursor "with no discernable boundary between the integral ledge and a remainder of the at least one shallow trench isolation structure". In the precursor of the invention there is inherently a boundary between those portions of the isolation structure and it would inherently be discernable because the entire structure is discernable.

Claim 13 is rejected under 35 U.S.C. 102(b) as being anticipated by Mandelman et al.

The rejection is maintained as stated in the paper mailed 7/21/04 and as follows.

Portions of the structure have a flat surface as recited. The claim does not require a particular surface to be flat.

Claim 13 is rejected under 35 U.S.C. 102(b) as being anticipated by Morita et al.

The rejection is maintained as stated in the paper mailed 7/21/04 and as above.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
